Summary

I am a third year Computer Engineering student, studying at Middle East Technical University, and looking for internship role in the software, data science and game industries worldwide.

I am passionate and energetic learner of mobile game and software industry, eager to learn new techniques and skills so that I can create better works. I am following and analyzing the industry all the time and keeping myself updated. I love creating games and software considering both my personal taste and everyone's liking.

I am highly interested to acquire more experience in the business environments by taking an active role in projects.

Technical Skills

- **Programming Languages:** C/C++, Haskell, Java
- **Tools:** Unity
- **Familiar with:** Git, Python, React Native, Blender, Adobe Illustrator

I am familiar with OOP concepts and design patterns. Getting better at writing clean and sustainable code.

Projects

- **Clever Goal!**

2019-2020

A hyper-casual 2D soccer game. You can shoot the ball considering different obstacles in each level with a slingshot mechanism. I implemented the whole game mechanic and designed colorful graphics, animations and 50 levels with different aspects and increasing difficulties.

- **Magnetic Cube Rush**

2021

A top-down collection based entertaining and relaxing game. Implemented and designed different and colorful levels. This project is the final result of a one month internship period.

Education

High Honor Student: 3.47/4 CGPA

Languages

English – Advanced (C2)

German – Elementary (A2.1)

Polish – Beginner A1.1

Turkish – Native

Information Technology

Lodz University of Technology

Lodz / Poland

2021 - 2022

Hobbies and Interests

I love learning new skills and pushing myself above my limits. I embrace the challenges and use them as steps to make myself better. I love failing, I love making mistakes and I love saying “how fascinating!” when I make those mistakes.

I believe the most unique ideas come at the moments of free mind. I am interested in oil painting, travelling, skateboarding and instrument playing. They enhance my creativity and help me come up with new ideas for my projects.
